

School Protocol for Students/Staff with COVID-19 Symptoms

*Schools need to **designate a staff member** to care for students identified at school with COVID-19 symptoms

The **isolation room should be an enclosed space separate from other people that is equipped with hand sanitizer, tissues, and a lined garbage bin. It should be cleaned and disinfected after use.

*****Siblings** at other schools may complete their day if asymptomatic, but must remain home after that – see **Return to School Protocol for Students with COVID-19 Symptoms**
